GRASS WITHOUT LIMITS

OUR PHILOSOPHY

ForeverLawn is the leader in the synthetic turf industry for two reasons—innovation and integrity. These two corporate values define ForeverLawn, and drive our every action. We have become accustomed to other companies following our lead, and are comfortable blazing new trails and taking our industry places it has never been.

The artificial grass products that we offer are each uniquely designed to meet a specific need or serve a certain purpose. Whether you are looking for a lush, beautiful landscape grass with a realistic appearance, or a rugged,

all-weather sports turf that will perform consistently even under rigorous conditions, you can look to ForeverLawn.

Being a leader means more than just offering superior products. It means taking solutions to the next level with new innovations such as the first antistatic grass, a knitted backing that allows instant drainage, a playground safety surface that is safe for fall heights up to 13 feet, and an industry-leading 8x8 safety surface warranty guaranteed to meet ASTM 1292 standards for 8 years at 8 feet.

That's why at ForeverLawn, we're not just ahead of the curve, **we're defining it.**

LANDSCAPE

DuPont™ ForeverLawn® Select Synthetic Grass

DuPont™ ForeverLawn® Select Synthetic Grass has taken realism to a new level. This innovative line of fine-bladed, lush synthetic grass features a tan thatch, multi-colored blades, and a newly-developed Memory Fiber™ blade that offers an unsurpassed natural appearance and performance. Ideal for residential and commercial landscaping, DuPont™ ForeverLawn® Select Synthetic Grass offers resilient blades, dense construction, and premium backing. Built on the ForeverLawn proprietary platform, this beautiful, low-luster grass product is great for replicating a natural grass look and feel in any environment.

Select Synthetic Grass

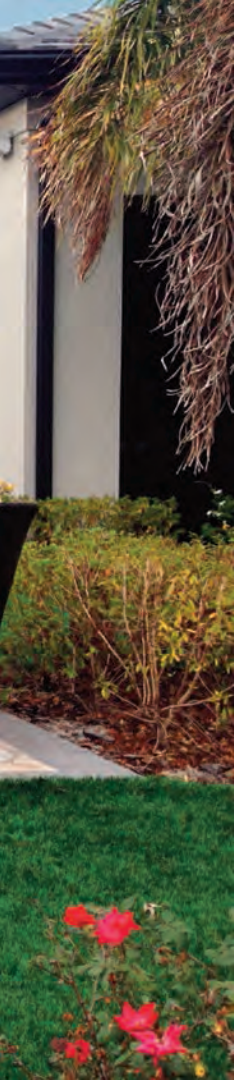

Natural appearance for a pristine landscape

Create the outdoor
living space you've
always dreamed of.
(Tampa Bay, FL)

foreverlawn.com

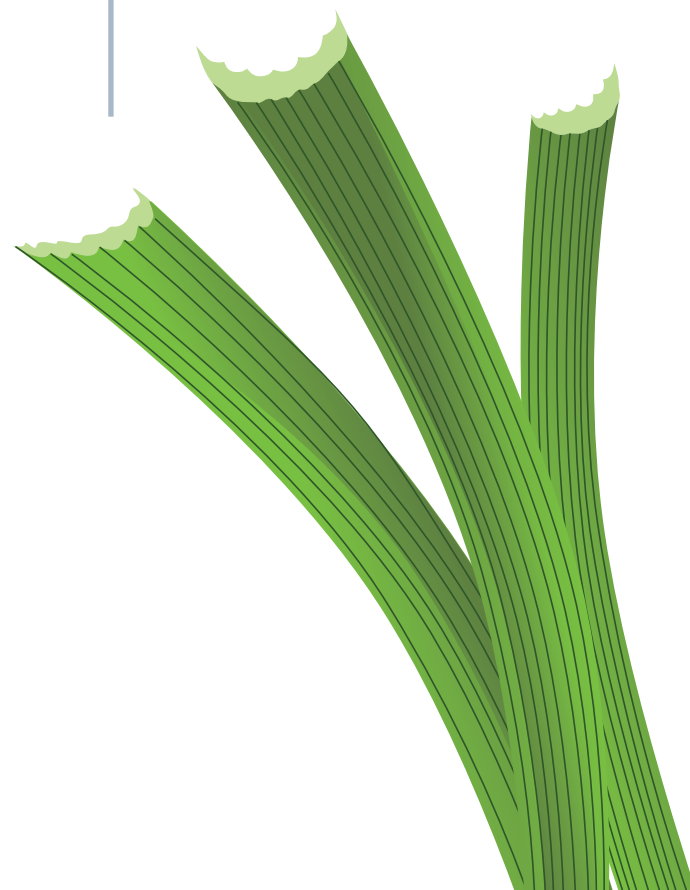

Simplify and beautify outdoor entertaining with our low-maintenance grass that is always usable, always green. (Alliance, OH)

MEMORY FIBER™ YARN

DuPont™ ForeverLawn® Select Synthetic Grass features a unique **Memory Fiber™ yarn** that provides improved resiliency, durability, and realism previously unavailable in a monofilament yarn. These properties help it look and feel more like natural grass initially and over time.

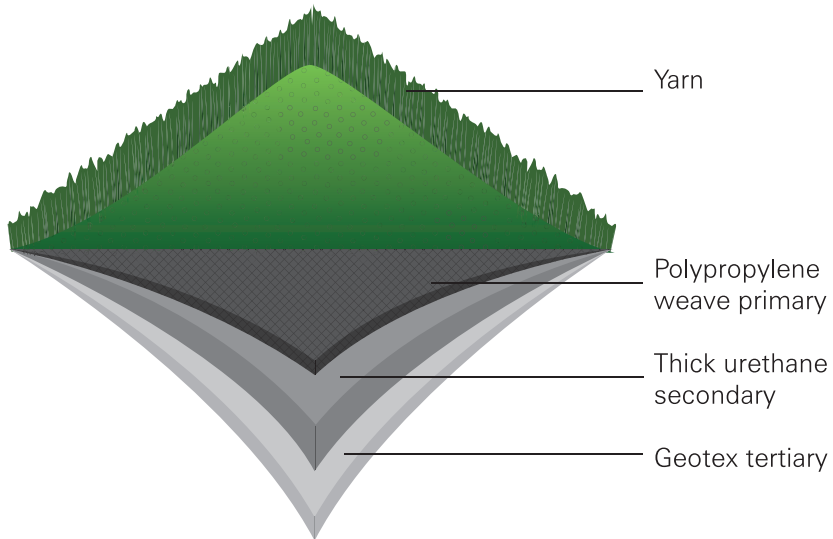

- Unique geometric shape for greater resiliency
- State-of-the-art resin to resist fracturing and breakdown
- Incredible grass-like performance and appearance

PREMIUM BACKING

DuPont™ ForeverLawn® Select Synthetic Grass is built on the most advanced, multi-layered backing system available.

- Proprietary backing system provides maximum stability
- Blades are encapsulated in backing for enhanced durability
- Made with post-consumer recycled materials from Project Yellowstone*

*Project Yellowstone is an innovative recycling program with Yellowstone National Park and Universal Textile Technologies in which plastic bottles from the park are recycled and made into backings for premium carpet and artificial turf.

GOLF

Our **Tournament Greens**, with incredible natural performance and appearance, are a great fit for professionals and avid golfers. These high-end polypropylene sand-filled greens give you the ability to catch chips from over 30 yards away with realistic performance, adjust the speed of your green after installation, and offer more design options when installing.

Our **Leisure Greens** bring the joy of golf to any environment with minimal maintenance and upkeep. These preset nylon fibers maintain a very consistent playing surface with little to no brooming maintenance. With no time wasted on grooming your green, you can spend more time enjoying it.

DOG FACILITIES

K9Grass is the artificial grass designed specifically for dogs. With its exclusive flow-through backing, short dense blade structure, and antimicrobial protection, K9Grass offers a cleaner, safer, better environment for pets.

Say goodbye to cold concrete, gravel, mulch, muddy yards, and dirty paws—K9Grass is the solution you have been looking for.

Pet facilities benefit from the long-term savings, added cleanliness, and increased revenues they see after installing K9Grass. Our patent-pending flushing system even allows for indoor installations. Safe, clean, beautiful, and durable—K9Grass is everything you want and need from a surfacing product.

Help outdoor facilities battle the elements or bring the outdoors inside with this drainable, cleanable surface for pets.

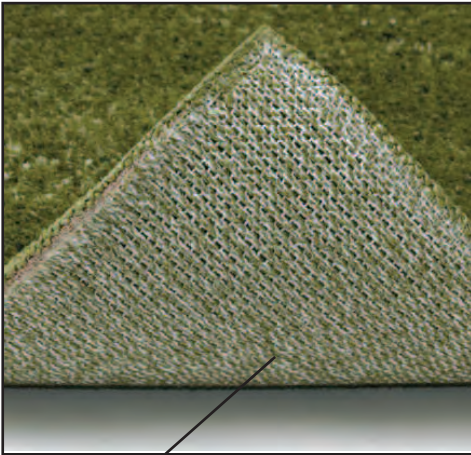

K9GRASS FLUSHING SYSTEM

Our revolutionary patent-pending indoor grass and flushing system provides the optimum performance for an indoor facility.

- 1 K9Grass - The artificial grass designed specifically for dogs
- 2 Plastic nailer board
- 3 Pipe that the water will flow through to rinse/flush the floor
- 4 Emitters or holes positioned according to water pressure
- 5 Water source and system portal (flushing areas typically separated into zones)
- 6 End caps mark the end of multiple flushing system zones
- 7 Sealed impermeable floor has a minimum 1.5% - 2.0% pitch toward the drain
- 8 Grid or lifter system elevates the grass 1" off the floor surface
- 9 Trench drain (preferred) receives the liquid waste and exits it out of the facility

KNITTED FLOW-THROUGH BACKING

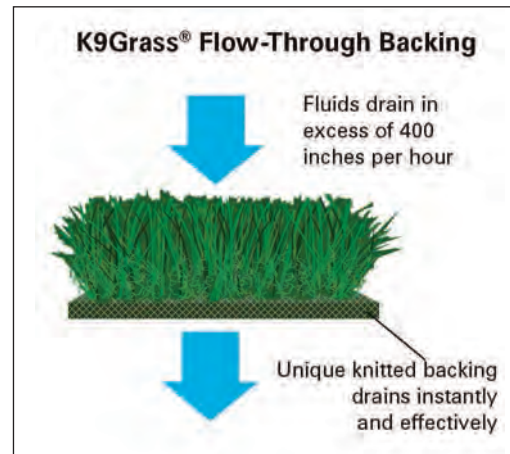

K9Grass knitted, flow-through backing allows fluids to drain through instantly.

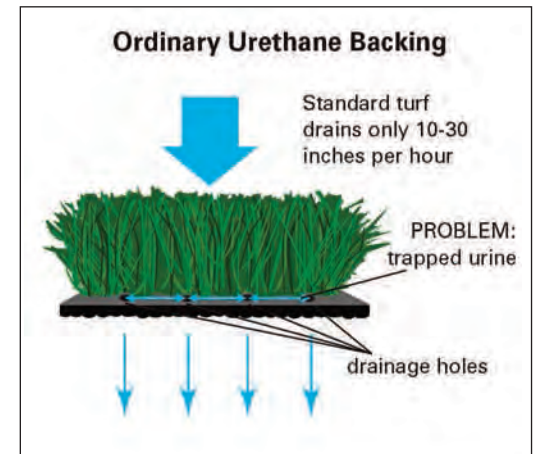

Ordinary urethane turf backing provides limited drainage opportunities, which can result in urine becoming trapped in the grass. This can lead to bad odors and unsanitary conditions. K9Grass provides a knitted flow-through backing, which provides exceptional drainage that allows fluids to drain through instantly and effectively. The proprietary technology of K9Grass backing provides the following benefits:

- Superior drainage
- Superior construction
- Superior durability
- Improved cleanliness

SUPERIOR

PLAYGROUND GRASS

Playground Grass by ForeverLawn is a deluxe, beautiful synthetic grass that is safe to play on, soft to fall on, and cost effective.

Whether transforming existing playgrounds or creating exciting, fun and safe new play areas, this revolutionary synthetic grass is ASTM 1292 safety rated, ADA accessible, and IPEMA certified. Choose Playground Grass Ultra for the added benefit of antimicrobial protection and our exclusive, patent-pending XStatic™ antistatic technology.

For waterparks and water play areas, ForeverLawn offers SplashGrass, a drainable, low-slip solution.

Transform your play areas
from being messy and
hard to keep in
compliance to being neat,
clean, and always safe.

Try our Funserts™ for an
added dose of creativity!

Funserts are vibrant,
playful designs made
from multi-colored
Playground Grass that
can be incorporated into
any playground.

playgroundgrass.com

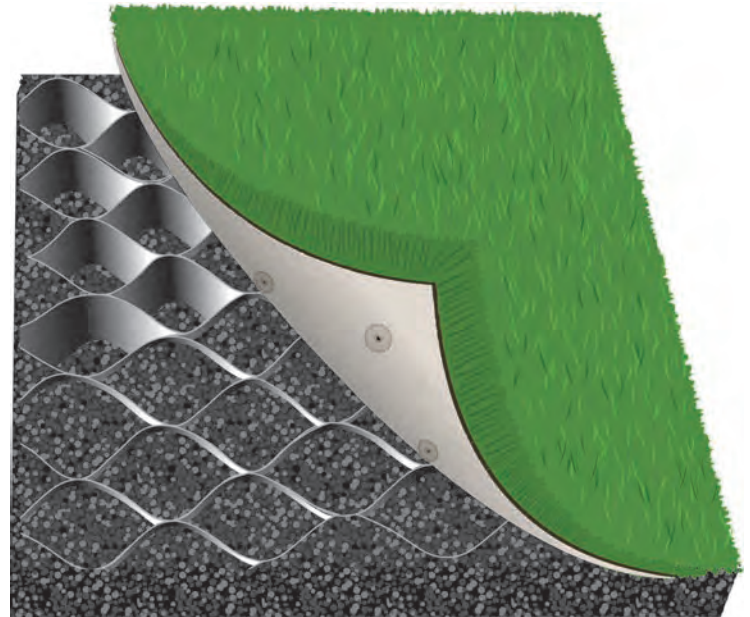

Playground Grass by ForeverLawn allows you to incorporate unique play elements with special colors or designs in the turf. (Lakeland, FL)

PLAYGROUND GRASS WITH SAFETYCEL™

Why risk a surface that barely meets requirements today, and has no guarantee for the future? Playground Grass gives you safety you can trust:

- Exceeds the Head Impact Criteria requirements by 63% on ASTM 1292 at 8 foot critical fall heights
- ASTM 1292 certified up to 13 feet
- Attractive, low-maintenance ADA Compliance
- 8x8 Safety Surface Warranty: guaranteed to meet ASTM 1292 standards for 8 years at 8 feet
- ForeverLawn exclusive patent-pending system

XSTATIC™ ANTISTATIC TECHNOLOGY

Static build up can be a serious problem for children with hearing aids and other electronic devices. That's why ForeverLawn developed Playground Grass Ultra with XStatic™ antistatic technology. This patent-pending technology in Playground Grass Ultra will not wear off over time or use, and is effective immediately upon installation of the turf.

Now this safe, accessible surface offers static reduction technology, making it the most innovative playground surfacing product on the market today. XStatic™ antistatic technology is available only from ForeverLawn, the leader in synthetic turf.

SPORTS FIELDS

Say goodbye to the problems that inferior turf brings to your sports program. **SportsGrass by ForeverLawn** is the solution, offering unmatched performance, a natural underfoot feel, and a playing surface second to none. You expect the best out of your athletes. Don't they deserve the best playing surface you can provide?

- No more excessive amounts of infill getting in the players' eyes.
- No more soft, squishy, low-performance feel or hard compacted surfaces that may lead to unnecessary injuries.

SportsGrass—Playing at a higher level.

Multipurpose fields require a durable surface that can withstand continuous use. SportsGrass provides maximum durability with a natural feel that athletes enjoy. (Hollywood, FL)

ENVIRONMENTAL STEWARDSHIP

ForeverLawn products are not only beautiful and functional, they also provide responsible landscaping options. ForeverLawn synthetic grass requires no water to maintain its realistic, green, beautiful appearance year-round, which saves millions of gallons of water each year that would otherwise be used to water natural grass lawns.

ForeverLawn helps reduce the introduction of chemicals into the environment by eliminating fertilizers, pesticides, and weed killers that are commonly used to maintain natural grass lawns. Now a perfectly manicured lawn can be achieved with no mowing, seeding, or edging, reducing emissions from lawn care equipment.

The ForeverLawn multi-layered backing system features recycled and renewable materials. The final backing layer is made completely from recycled plastic bottles, and a second layer features BioCel technology created from soybean plants, which are a 100% renewable resource.

Green builders may utilize ForeverLawn products to meet U.S. Green Building Council LEED® guidelines. Artificial grass by ForeverLawn may contribute towards satisfying credits under LEED in several categories including SS 61, SS 62, WE 1, MR 4, and MR 6.¹

¹"LEED Materials: A Resource Guide to Green Building" by Ari Meisel

foreverlawn.com

ForeverLawn is proud to participate in **Project Yellowstone**, an innovative recycling program with Yellowstone National Park and Universal Textile Technologies. In this environmental stewardship effort, plastic bottles from the park are recycled and made into backings for premium carpet and artificial turf.
